Khushi Rai

Roll No.:
25SCS1003005621

Academic Batch:
2026-2027

Degree:
B.Tech CSE

University:
**IILM University,
Greater Noida, U.P.**

Internship Profile:
Data Analyst at BeeSkilled (6 Weeks)

Internship Overview & Host Profile

Organisation Profile: BeeSkilled

"Tech and Internships"

Domain:

AICTE & MSME registered online skill-development and internship platform.

Leadership:

Ms. Simranjeet Kaur, Founder & Programme Head

Strategic Context

The Challenge

Transforming raw, incomplete, and unorganised transactional datasets into actionable, decision-ready business insights.

Technical Objectives

- ✓ Excel-based aggregation & Pivot Tables
- ✓ Python/Pandas data wrangling
- ✓ Power BI business measures (DAX)
- ✓ Stakeholder reporting & storytelling

Academic Scope

Mastery of business analytics workflows using structured practice datasets within a training environment, eliminating live-production risk.

Tools & Technologies Stack

Tool	Purpose	Application during Internship
Microsoft Excel	Spreadsheet-based data organisation	Sales analysis & Pivot Table dashboards
Python	General-purpose programming	Dataset loading, inspection, and cleaning scripts
Pandas	Data manipulation	Utilised head(), info(), describe(), and exported clean_data.csv & filtered_data.csv
Power BI	Business intelligence & DAX	Capstone dashboard creation & calculated measures

Phase:

Week 1 – Excel Analysis

Dataset Context:

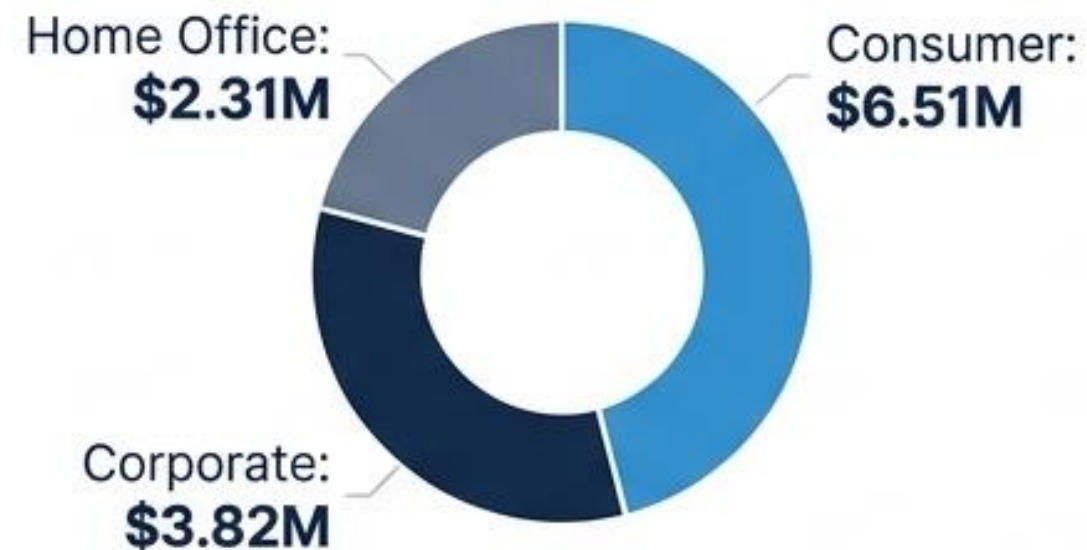

Global Superstore Orders

51,290 records
24 columns

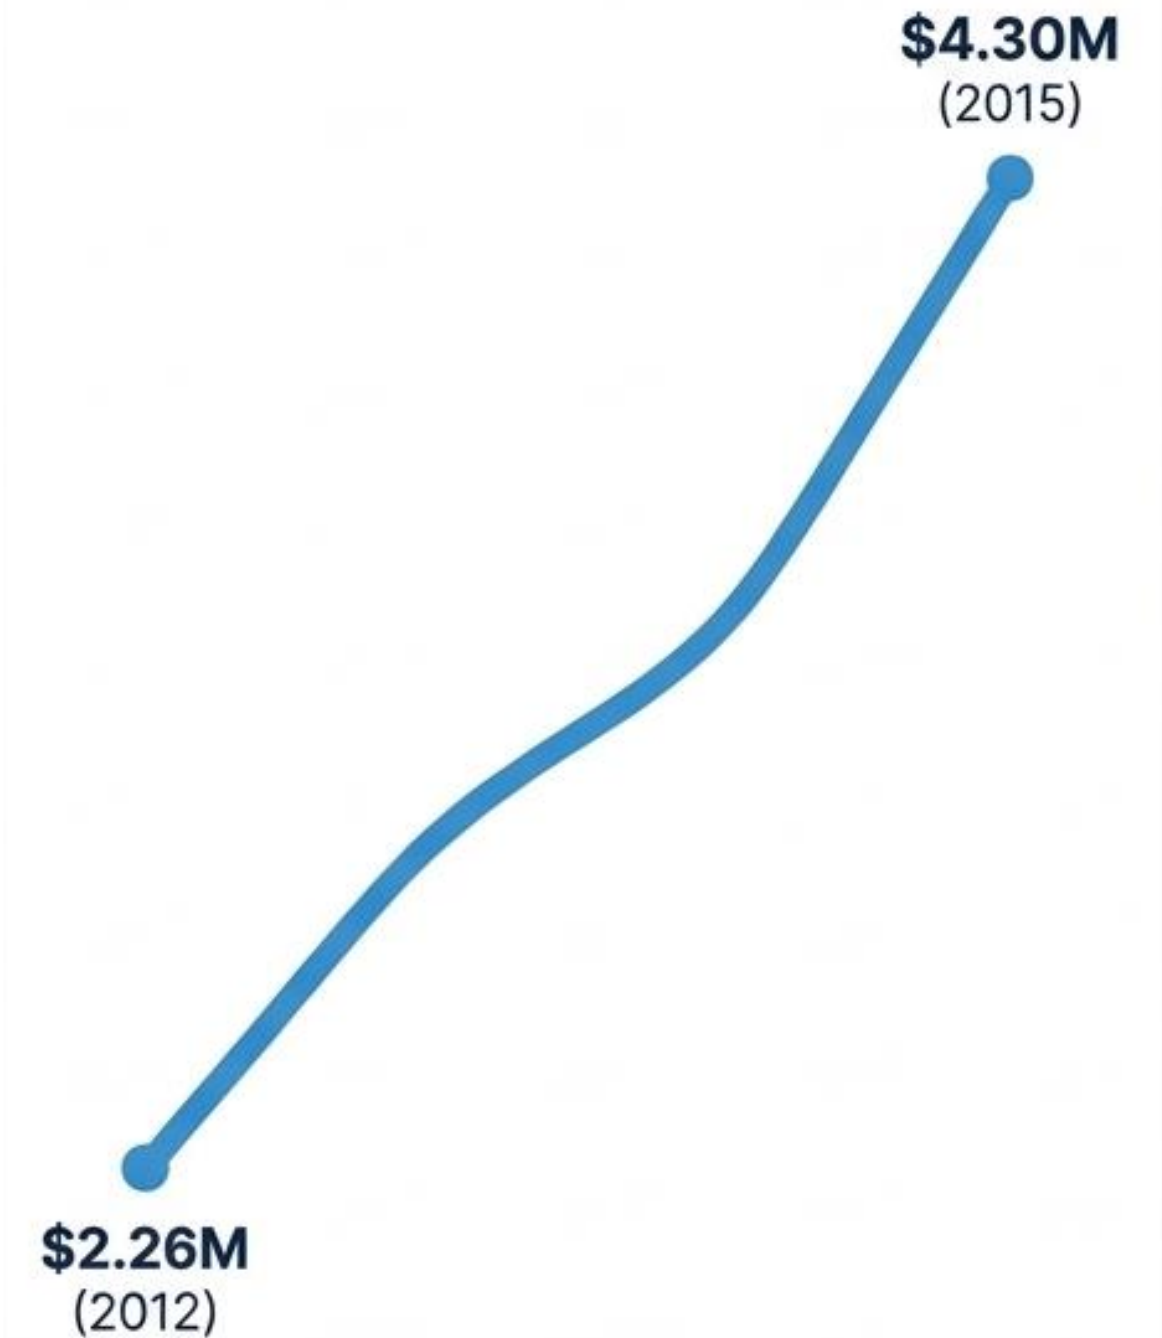

Category Sales

Segment Sales

Yearly Sales Trend

Week 2 – Python & Pandas Exploration

Initial Dataset Inspection

Dataset: Sales Dataset

Records: 200

Columns: 10

`df.shape`

`df.info()`

`df.head()`

`df.describe()`

Descriptive Statistics Output

4.91

Average Quantity

\$2,421.50

Average Unit Price

\$12,101.54

Average Total Price

\$47,940.00

Maximum Total Price

Week 3 – Data Wrangling & Cleaning

Dataset: Workout activity (32 records, 5 columns: Duration, Date, Pulse, Maxpulse, Calories).

Step 1: Anomalies Detected

- ⚠ 1 duplicate record
- ⚠ 1 missing Date value
- ⚠ 2 missing Calories values

Step 2: Transformations Applied

- ⚙ Standardised Date to datetime
- ⚙ Interpolated missing Date
- ⚙ Filled missing Calories with mean
- ⚙ Feature Engineering: Derived Calories_Per_Minute

Step 3: Processed Outputs

- 📄 cleaned_data.csv
(31 rows, 6 columns – zero missing values)
- 📄 filtered_data.csv
(Subset where Calories > 300)

Week 4 – Power BI Capstone & Data Validation

Capstone Dataset (700 rows, 16 columns) exported as Week_4_Cleaned_Data.csv.

Logic & Enrichment

Anomaly Action

53 blank 'Discount Band' records identified (zero discount).
Categorised as 'No Discount' to retain valid transactions.

Data Enrichment

Created 'Year-Month' helper field for temporal analysis.

Mathematical Consistency Check

$$[\text{Units Sold}] \times [\text{Sale Price}] = [\text{Gross Sales}]$$

$$[\text{Gross Sales}] - [\text{Discounts}] = [\text{Sales}]$$

$$[\text{Sales}] - [\text{COGS}] = [\text{Profit}]$$

Power BI DAX KPIs & Dashboard

\$118,726,350

Total Sales

\$16,893,702

Total Profit

1,125,806

Total Units Sold

\$169,609

Average Order Value

14.2%

Profit Margin

700

Total Orders

Key Business Findings & Insights

Top Performers

- ↑ Most Profitable Segment: **Government** (\$11.39M profit)
- ↑ Highest Sales Region: **USA** (\$25.03M)
- ↑ Top Product: **'Paseo'** (strongest sales & profit)
- ↑ Peak Seasonality: **Q4** (October & December 2014)

Areas of Concern

- ↓ Unprofitable Segment: **Enterprise** (-\$614,546 loss)
- ↓ Underperforming Product: **'Carretera'** (lowest performance)
- ↓ Lowest Sales Period: **September 2013**

CRITICAL INSIGHT: 8.3% of Orders (58/700) are loss-making, strongly tied to Medium/High discount bands.

Recommendations & Outcomes

Business Recommendations

Reassess discount approval bands and enforce strict profit margin thresholds to eliminate loss-making deals.

Conduct an immediate audit of the Enterprise segment and 'Carretera' pricing structure.

Align Q4 inventory and resourcing with validated seasonal demand peaks.

Prioritize targeted marketing efforts for Paseo products in USA to maximize profit.

Academic Learning Outcomes

Excel Aggregation

**Python & Pandas
Wrangling**

Power BI & DAX

Data Storytelling

Business Analytics

Proof Of Completion

Thank You
